Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=110360&lokasi=lokal>

Abstrak

Tujuan penelitian ini membuktikan bahwa diterapkannya pragmatisme Amerika dan adanya kesempatan yang diperoleh perempuan untuk bekerja di masa Perang Dunia II dan melahirkan rasa penghargaan (self-esteem) dan rasa kemampuan aktualisasi diri (self actualization). Metode Penelitian kualitatif dengan sumber data teks. Jenis penelitian kepustakaan, sifat penelitian deskriptif, interpretatif dan analitis. Metode pengumpulan data melalui penelitian kepustakaan dan pola pengkajian teori. Sifat penelitian induktif.

Sumber kajian: primer dan sekunder. Permasalahan Penelitian adalah diterapkannya pragmatisme Amerika dan adanya kesempatan yang diperoleh perempuan untuk bekerja di luar era Perang Dunia II.

Landasan Teori: 1) Teori Kebudayaan yang mencakup konsep kebutuhan adab. 2) Teori Kebudayaan dalam Feminisme, mencakup: feminisme liberal, hubungan feminisme dan kapitalisme, tekanan terhadap kaum perempuan, bakat dan keterampilan perempuan. supremasi laki-laki, kesetaraan antara perempuan dan laki-laki. reaksi neurotik perempuan terhadap kekuatan hakiki kaum pria, struktur dan diskriminasi gender dan tenaga profesionalisme. 3). Pragmatisme yang mencakup: persepsi tentang kebenaran, the theory of meaning, persepsi tentang manusia, teori humanisme, konsep the tough-minded soul, ajaran tentang demokrasi individualisme dan idealisme Amerika. 5). Teori Kepribadian Humanistik yang mencakup: kebutuhan rasa penghargaan (self-esteem), kebutuhan rasa aktualisasi diri, pemenuhan D-motivation dan pencapaian B-metamotivation

Hasil penelitian menunjukkan Pragmatisme Amerika memberikan kesempatan kepada perempuan untuk bekerja sehingga melahirkan rasa penghargaan diri (self esteem). rasa kemampuan aktualisasi diri (self actualization), pemenuhan D-motivation dan mencapai B-metamotivation.

Sikap paradoks pragmatis pemerintah dan masyarakat kapitalis Amerika yang memberikan kesempatan kepada perempuan untuk mencapai (self-esteem) dan (self-actualization), membuktikan bahwa perempuan ternyata pekerja profesional secara alamiah dan naluriah. Namun. kesempatan ini hanya dinikmati sesaat karena diterapkannya kembali pragmatisme sehingga perempuan kehilangan pekerjaan. Hal ini membuktikan bahwa pria mendahulukan "American Adam" dan menerapkan "set-recognition" sebagai pengaruh kebudayaan laki-laki.

<i>The purpose of research is to prove that the implementation of American Pragmatism and the working opportunity obtained by women in the era of World War II creating women's need of self-esteem and self-actualization.

The Method of Research is the Qualitative Method of which texts as data's resources, the type of research is library research, the nature of research is descriptive, interpretative and analytical. The method of collecting data is through the library research using the pattern of theoretical analysis. The resources of data analysis are primary and secondary.

The problem of the research is the implementation of American Pragmatism and the working opportunity obtained by women in the era of World War II.

The Theoretical Framework: I). The theory of culture included the concepts of- the Cultural Need, the Cultural Theory of Feminism, covered.- Liberal feminism, the relation between ,feminism and Capitalism, pressure towards women, women's talent and skill, men's supremacy. The equality between men and women, women's neurotic reaction towards men's natural strength, the structure & gender discrimination and professional workers. The theory of Pragmatism include, the concepts of truth, the theory of meaning, the pragmatic perception of men, humanism, the tough-minded soul, the teaching of democracy - individualism and American Idealism.

The Humanistic theory by Abraham Maslow included: the need of self-esteem, the need of self-actualization, D-motivation and B-metamotivation.

The method of research: qualitative method, textual data resources, type of research: library research, the nature of research: descriptive, interpretative and analytical research. The method of data collecting through the library research and the method of theoretical analysis and inductive research. Primary and secondary analytical resources.

The result of research: to prove that the application of American Pragmatism provided the opportunity ,for American women to replace men's positions had created the women's need of self-esteem, self-actualization, D-motivation and B-metamotivation.

The pragmatic paradox attitude of American government and society has provided the c 7ortunities to women to achieve their self-esteem, self-actualization, D-motivation and B-metamotivation, proved that American women are obviously natural and professional workers. Nevertheless, these opportunities only given to women until the government and the capitalists applied another pragmatic decisions which gave priority to men workers, sot hat, the women should leave their jobs and go back to household. This condition proved that the American government and capitalists provide priority to men as revelation of ?American Adam? and the application of ?self-recognition? theories as the impact of men?s culture.</i>
