

Analisis komparasi antara pengguna sistem registrasi web based dan nonweb-based dalam penerimaan inovasi teknologi informasi

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=115470&lokasi=lokal>

Abstrak

This research investigated the behavioral differences between web-based registration system's users and manual registration system's users. There are several difference characteristics of each user for instance; personal innovativeness in the domain of information technology (PIIT), attitude, usefulness, ease of use, subjective norm, behavioral control, facilitating condition and self efficacy.....
