

Perbandingan metode model-based dengan metode K-mean dalam analisis cluster

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=115713&lokasi=lokal>

Abstrak

K-mean methods is a clustering method in which grouping techniques are based only on distance measure among observed objects, without considering statistical aspects. Model based clustering is a method that uses statistical aspects, as its theoretical basis i.e. probability maximum criterion.....
