

Perkembangan uji tanah dan strategi program uji tanah masa depan di Indonesia

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=116258&lokasi=lokal>

Abstrak

Soil testing using single-nutrient soil analysis in Indonesai has been developing since 1970. However,due to the limiting research fund,soil testing has not been programmed continuously and rekomendatation of location specific fertilization based on soil family has also not yet been established.....
