

Ketahanan dan stabilitas pasokan permintaan dan harga komoditas pangan

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=118237&lokasi=lokal>

Abstrak

Global food problem today is triggered by soaring international food prices. The factors underpinning the rising prices include high oil prices and energy costs, which lead to higher input costs such as fertilizer and freight costs; increasing demand for rice in India due to substitution of rice for wheat, disaster in Vietnam and Myanmar; panic buying in the Philippines and possible influence of speculators.....
