

Perancangan hotspot dan radius server di Universitas Kristen Maranatha dengan Microsoft IAS

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=119464&lokasi=lokal>

Abstrak

Nowadays, wireless technology is being popular because of its benefits that is not owned by ordinary cable network, for example is the mobility. But this wireless technology has been implemented rarely in a big scale because there are problems to arrange the Authentication, Authorization, Accounting, and Auditing (AAAA) for users....
