

Physical characteristics and aesthetic of urban streets

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=119516&lokasi=lokal>

Abstrak

Streets, particularly those located in urban areas, are multifaceted. It is an entity, which can be viewed not only through its physical form as channels of movements as it was originally designed for, but it has been regarded as one of the important components of urban fabrics constituting the quality of the urban areas.....
