

Pengenalan pola huruf Jepang (KANJI) menggunakan direction feature extraction dan learning vector quantization

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=121331&lokasi=lokal>

Abstrak

Japanese letter (kana) is a unique and highly complex character compared to usual Roman's letter, particularly in its hand written form. Japanese letter can be grouped into hiragana and katakana, where both have different writing rules....
