

Populasi pohon jenis dipterocarpaceae di tiga tipe hutan pamah Kalimantan [Tree population of Dipterocarpaceae Species In Tree vegetation Types of Lowland forests Kalimantan]

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=121941&lokasi=lokal>

Abstrak

Data of Dipterocarpaceae species have been extracted from 8 studied plots of 1-ha each, distributed in three types of natural forest in Kalimantan (those were 4 plots in mixed dipterocarps forest, 2 plots in peat swamp forest and 2 plots in heath forest types) for further population analysis....
