

Toleransi sengon buto (*Enterolobium cyclocarpum* Griseb) yang ditanam pada media limbah tailing tercemar sianida dengan perlakuan pupuk [Tolerance of Sengon buto (*Enterolobium cyclocarpum* Griseb) Grown on Cyanide Contaminated Tailing Media with Fertilizer application]

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=121951&lokasi=lokal>

Abstrak

Sengon buto (*Enterolobium cyclocarpum* Griseb) is one of the potential plant species for land reclamation and possibly for phytoremediation because of its fast growing even on poor soil, and its ability to fertilize soil through nitrogen fixation.....
