

Kajian penilaian kerentanan dan mekanisme pertahanan banjir di daerah perkotaan

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=122190&lokasi=lokal>

Abstrak

Nowadays flood is a serious problem in Jakarta, and this is caused by the uncontrolled urbanisation and bad watershed management in the upper stream. During the 2007 flooding in Kampung Melayu, Jatinegara district, East Jakarta is one of areas that suffered from big losses....
