

dampak deraan kekeringan pada fase inisiasi bunga, fase berbunga dan fase pembentukan polong terhadap pembentukan bunga dan buah pada empat varietas vigna radiata

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=122260&lokasi=lokal>

---

#### Abstrak

One of the greatest affected factors towards the growth of *V. radiata* is consideret as the availability of water. Obviously, less production of *V. radiata* is due to short water supply....
