

Removal of arsenic (V) from aqueous solutions using chemically modified sawdust of spruce (*Picea abies*) : Kinities and isotherm studies

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=125542&lokasi=lokal>

Abstrak

Arsenic is a ubiquitous element in the environment and occurs naturally in both organic and inorganic forms. Under aerobic condition, the dominant form of arsenic in waters is arsenate, which is highly mobile and toxic....
