

Bathymetry and sedimenttation in palapacquen lake, san pablo city, laguna, philippines

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=127929&lokasi=lokal>

Abstrak

Remotely sensed images of san pablo, laguna have shown features of inlet sedimentation at palacpaquen lake which is not observed in the order lakes. we studied the sedimenttation process using the bathymetry of the lake as well as the type of sediments being deposited into the lake....
