

Penentuan waktu tanggap termal batang bahan bakar selama pemadaman reaktor nuklir dengan menggunakan model adiabatik

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=128966&lokasi=lokal>

Abstrak

Determination of thermal time constant of fuel pin during nuclear reactor shut down by using adiabatic model. A complex shut down process of nuclear depends on different parameters of fuel design and of reactor operation. In correlation to TIA and LOCA analyses of reactor core, the shut down process is characterized by a time constant...
