

Listrik sebagai ko-produk potensial pabrik gula

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129065&lokasi=lokal>

Abstrak

Global energy crisis not only impact the increase in electricity price but also influence the shortage of electricity supply, so that the development of bioenergy as a potential renewable energy resource needs to be accomplished. Sugar cane is the potential energy resource to produce electricity. Some sugar producing countries have already sold electricity surplus to local company....
