

Menentukan kedalaman dan ketebalan akuifer dengan metode logging tahanan jenis pada waktu pengeboran air tanah

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129299&lokasi=lokal>

Abstrak

The aim this resistivity logging measurement is to decide the stratification of rock and distribution of aquifer based on the resistivity value. The objective of the well logging is to determine the depth and thickness of aquifer for well construction, in order to decide the position of screen in the aquifers...
