

Pemanfaatan zeolit pada sumur resapan air hujan untuk mengurangi resiko pencemaran air tanah akibat limpasan hujan untuk pengembangan SNI 06 - 2459 - 2002

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129320&lokasi=lokal>

Abstrak

Groundwater recharge technology is the effort to reduce excessive surface runoff and to conserve the groundwater as well. However, runoff can disperse the pollutants which then accumulate in water bodies....
