

Efektivitas variabel mediator berdasarkan kontribusinya dalam model mediasi sederhana

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129495&lokasi=lokal>

Abstrak

Structurally relationship of variables is important in deeply analysis of path models, but the process of effect distribution must be concerned. In this situation, one or more variable would be mediator variable which assessing effect of an independent to a dependent variable. We studied the simple mediation model that is one of path analytical models which contain of one independent variable, dependent variable and mediator variable....
