Abstrak

Tesis ini menganalisis pengaruh perbaikan fasilitas perdagangan terhadap ekspor Indonesia. Indeks fasilitas perdagangan dari port efficiency, customs environment, service sector infrastructure, dan regulatory environment merupakan indikator yang mempengaruhi ekspor Indonesia. Metode panel data dengan gravity model digunakan untuk meneliti 20 negara mitra dagang Indonesia dengan periode penelitian 2002-2007. Hasil empiris menunjukkan bahwa port efficiency, custom environment, dan regulatory environment di Indonesia dan negara mitra dagang berpengaruh positif dan signifikan terhadap ekspor Indonesia. Selain itu service sector infrastructure di Indonesia juga berpengaruh positif dan signifikan terhadap ekspor Indonesia. Tetapi service sector infrastructure di negara mitra dagang tidak berpengaruh terhadap ekspor Indonesia.This thesis analyzes the effect of improvements of trade facilitation on Indonesia export to the country's trading partners. The index of trade facilitation such as port efficiency, customs environment, service sector infrastructure, and regulatory environment are the indicators that affect the export of Indonesia. Panel data method with the gravity model is used to estimate 20 trading partners research during period 2002-2007. Empirical results show that port efficiency. custom environment, and regulatory environment in Indonesia and the country trading partners have significant and positive effect on Indonesia export. In addition service sector infrastructure in Indonesia is also positively and significant effect on the export of Indonesia. But the service sector infrastructure in the country trading partners does not affect the export of Indonesia.
