Abstrak

Local legislation program is a mapping for the shake and priority scale for establishing local regulation implemented through needs analysis activity local law apparatus. In the explanation of article 15/2004 on legislation establishment might be seen that program of local regulation establishment is an Instrument of Local Legislation Establishment Planning, that is systematically arranged and integrated and it is arranged in the framework of realizing Local Law Development which is synchronizes to National law. Local legislation program becomes the foundation in carrying governance out whether it is for Local House of Representatives or Local Government in making a public policy. The making of Local Legislation might be implemented if there's : change on Central Government Policy, earthquake and in emergency and change on level of community needs. Of current observation result, Province of Gorontalo in establishing Local Regulation is more based on current needs and unprogrammed and waits for one another between related stakeholder, moreover, Local legislation isn't established yet is still a new program. Therefore, Consultation Assistance in Local Legislation Program Arrangement in Province of Gorontalo is still badly needed in order to support the Implementation of Middle and Long term Development Program.
