Abstrak

Objectives of this study are to find out how the Islamic party and the Islamic-Based party in Tasikmalaya understands and gives his perception on the implementation of the Islamic Shari'a in Tasikmalaya. Data collection is done by in-depth interviews, went into the field and direct observation with a sampling method is done deliberately (purposive sampling), while the approach to be used in this study is the symbolic interaction approach by trying to understand the meaning of human behavior in life, motives, insight, and internalization of values. Based on this research, it can be concluded that in addressing, understanding and perception of the application gives the Islamic Shari'a in Tasikmalaya, tend to be careful. This began when the Islamic party and how Islamic based on the district understand the "religious/Islamic" as stipulated in the vision-mission Tasikmalaya regency. So far, these parties do not make sense and understand the vision and mission as the juridical basis or a gate to then apply the concept of Islamic law which was adopted by the government. This is because the parties are aware there is no legal basis which provides higher greater authority to the region to implement Islamic law as a whole.
