

Hypertensi dan faktor - faktor risikonya di Indonesia

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=135388&lokasi=lokal>

Abstrak

This study describes the hypertension rate in Indonesia in 2007 and its related factors. The data was obtained from RISKESDAS (rised Kesehatan Dasar/Basic Health Research) 2007 which included questions of individual, social and physical health of respondents aged 15 years and more during the data collection.
