

Kajian infertil pria di Laboratorium infertil-andrologi Puslitbang sistem dan kebijakan Kesehatan Surabaya tahun 2005 - 2008

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=135431&lokasi=lokal>

Abstrak

Appropriate laboratory testing is an integral component of the proper evaluation of the male with infertility. Semen Analysis was the window to know the quality of a man's semen. In the infertile couples, first it should be checked the semen of man's counterpart, because its procedure is relatively easy and cheap. If the result of semen analysis is normal, then the wife counterpart was conducted by obstetric. The objective of this study was to evaluate the males sperm among infertile couples, we have done sperm analyses of infertile-andrology laboratory of the center of health system and Policy Research and Development in Surabaya.
