Abstract

This subject was made based on a need to provide an input for betterment and development of a social security system for workers in Indonesia based on current laws and regulations in Indonesia. These laws and regulations on unemployment payment benefit will be a base to research and analyze if the workers get enough to stand the crucial time during their unemployment period. Ideally, the payment will increase their prosperity or at least to support themselves and their family life during their difficult time, that is on unemployment. This payment of unemployment will also increase the prosperity of the local area and as well as the whole country.
