Abstrak

Penelitian ini bertujuan untuk mengetahui adanya hubungan teman sebaya (peer group) dengan perilaku berpacaran. Metode penelitian adalah deskriptif korelatif yang pengambilan sampelnya dilakukan dengan purposive sample. Responden adalah siswa/i kelas X dan XI di SMAN 90 Jakarta. Hasil penelitian didapatkan bahwa 65,62% peran peer group remaja tidak sesuai konsep dan teori terkait, dan sebanyak 48,96% perilaku berpacaran remaja berisiko sedang. Kedua variabel kemudian dianalisis dengan chi square dan didapatkan nilai $p=0,826$, adapun $\alpha=0,05$ maka $p>\alpha$, berarti tidak ada hubungan antara peer group dengan perilaku berpacaran. Berdasarkan hal tersebut peneliti juga menganalisis data demografi, dan hasilnya jenis kelamin dan status berpacaran berhubungan dengan perilaku berpacaran remaja. Hasil penelitian ini diharapkan dapat memberikan informasi tentang peran peer group dan pola perilaku berpacaran remaja, sehingga dapat dilakukan edukasi berupa kesehatan reproduksi maupun psikososial remaja.

This research is taken for analyzing the relation between peer groups with behaviour of having an affair. The research method is correlative description with the intake sample method is purposive sampling. Respondents are students of Jakarta 90 Senior High School, grade X and XI. The result of the univariate analyse is that 65,62% of adolescent peer group's role is inappropriate, and 48,96% behaviour of have an affair adolescents having medium risk. Both of variables are analysed with chi square and the result of p value $=0,826$ with $\alpha=0,05$ so $p>\alpha$ value, it means that peer groups is not related to behaviour of having an affair. Based on the results, researcher also analysed the demography data and the results are gender and status of having an affair have relation with behaviour of have an affair. The results of this research can give informations about peer group's role and behaviour of have an affair adolescents, so the education of health reproduce and adolescents psikosocial can be taken.
