Abstrak

Penyakit kulit merupakan gangguan kulit yang salah satunya bisa disebabkan oleh banjir. Pengetahuan masyarakat korban banjir tentang penyakit kulit dipengaruhi oleh beberapa faktor. Penelitian ini bertujuan untuk mengetahui adakah hubungan tingkat pengetahuan masyarakat tentang penyakit kulit dengan kejadian penyakit kulit. Desain penelitian ini menggunakan pendekatan korelasi dengan sample 68 orang di Kampung melayu RW 10 Bukit Duri. Instrumen penelitian ini berupa kuisioner berisi 38 pertanyaan. Dengan uji Chi Square pada alpha (0.05) diperoleh hasil nilai χ^2 (0.7175). Sehingga hasil penelitian didapatkan bahwa adanya hubungan tingkat pengetahuan masyarakat korban banjir tentang penyakit kulit terhadap kejadian penyakit kulit di Kampung melayu RW 10 Bukit duri. Peneliti menyarankan agar dilakukan penelitian lebih lanjut, karena di daerah Kampung melayu RW 10 Bukit duri banyak terdapat resiko penyakit akibat banjir.

.....One of the causes of skin disease is from flood disaster. The citizens who are impact from the flood disaster, their knowledge about skin disease were come from many factors.
