Abstrak

Timbang terima pasien membantu perawat mengidentifikasi area pelayanan untuk meningkatkan keselamatan pasien. Penelitian bertujuan mengetahui pengaruh pelatihan timbang terima pasien terhadap pelaksanaan timbang terima dan penerapan keselamatan pasien oleh perawat pelaksana di rumah sakit Husada Jakarta. Penelitian menggunakan desain preeksperimental dengan one group pretest-posttest design. Sampel 43 orang perawat pelaksana. Hasil penelitian menunjukkan peningkatan yang bermakna pada pelaksanaan timbang terima dan penerapan keselamatan pasien setelah mendapatkan pelatihan timbang terima pasien (p value : 0.000). Kesimpulannya, ada pengaruh pelatihan timbang terima pasien terhadap pelaksanaan timbang terima dan penerapan keselamatan pasien. Rekomendasi penelitian ini adalah komitmen untuk melaksanakan timbang terima dalam bentuk kebijakan, pengarahan serta evaluasi pelaksanaan timbang terima, untuk kesinambungan asuhan keperawatan yang berdampak pada peningkatan penerapan keselamatan pasien.

<hr>The patient handover help nurses to identify the service area that require improvement to improve patient safety. The purpose of this research was to identify the effect of training on patient handover with an effective communication approach integrated to the implementation of patient safety to the implementation of handover and patient safety by nurse practitioner at Husada Hospital Jakarta. This research used preexperimental design, with one group pretest posttest design. The sample is 43 nurse practitioner. From the data analysis, it has been recognized that there is a significant improvement in the implementation of patient handover and patient safety after getting a training and guidance on patient handover (p value : 0.000). The conclusion, there is an effect of training on patient handover to the implementation of handover and patient safety. Hospital should implements patient handover effectively in the form of policies, direction and evaluation to continuity of nursing care that have an impact on improving the implementation of patient safety.
