Abstrak

Under Indonesian land registration system the government has duty to accomplishing legal-cadaster through entire land in Indonesian territory. On the government interests the result of land registration is needed to initiate development planning and the implementation. By this assumption the author here does analyze toward the revision government regulation which concerning on land registration. The initial regulation was under Government regulation number 10 year 1961 which has been revised by the number 24 year 1997. Many significant aspects can be founded in the new regulation which regards on the effort to give legal certainty ahead the land owners. There are proved by the comprehensive procedurals, and also giving more opportunity to local people to reach land certificate in lesser written evidence.
