Abstrak

Penelitian bertujuan untuk mengetahui pengaruh budaya organisasi dan status kesehatan terhadap kinerja dosen di Politeknik Kesehatan Kementerian Kesehatan Jakarta II. Penelitian dilakukan pada dosen tetap selama bulan Mei sampai Juni 2012. Berdasarkan evaluasi yang pernah dilakukan sebelumnya kinerja pada aspek pengajaran, penelitian, pengabdian masyarakat belum mencapai maksimal. Berkaitan hal tersebut maka perlu dilakukan penelitian untuk mengetahui ada/tidaknya peningkatan kinerja. Merupakan penelitian kuantitatif menggunakan metode cross sectional dan pengambilan sampel secara proportionate stratified random sampling. Kuesioner dengan 20 pertanyaan untuk mengukur indikator profesionalisme, kepedulian, kondisi mental dan aktivitas berolah raga. Pemeriksaan langsung berat badan dan tinggi badan untuk mengukur BMI. Analisis data menggunakan SEM-SmartPLS. Sampel berjumlah 67 dosen yang diambil dari 103 dosen. Analisis dilakukan antara variabel eksogen dengan endogen pada model yang diajukan. Budaya organisasi mempengaruhi kinerja 11,4% dan status kesehatan memberi pengaruh 25,2% terhadap kinerja. Prediksi model penelitian 8,7%. Variabel budaya organisasi dan status kesehatan signifikan berpengaruh terhadap kinerja.
