## Abstrak

### **<b>ABSTRAK</b><br>**

Kontrasepsi IUD merupakan salah satu metoda kontrasepsi jangka panjang non hormonal yang merupakan salah satu metoda efektif yang diterima oleh masyarakat. Konseling pra pemasangan sangat penting karena membuat klien paham, lebih puas dan membantu klien dalam menggunakan kontrasepsi lebih lama sehingga meningkatkan keberhasilan KB. Akseptor IUD di Puskesmas Abadijaya masih rendah. Konseling pra pemasangan belum dilakukan sesuai langkah Baku Pemasangan Kontrasepsi Terkini. Penelitian menggunakan desain deskriptif dengan cara non random sampling dengan teknik accidental sampling. Dilakukan di wilayah kerja Puskesmas Abadijaya pada bulan Maret- Mei 2012. Sampel adalah akseptor KB IUD sebanyak 47 orang. Hasil penelitian menunjukkan bahwa pengetahuan akseptor Baru KB IUD tentang metoda KB IUD masih kurang yakni 63,83%. Untuk meningkatkan pengetahuan akseptor KB IUD maka salah satu cara yang dilakukan adalah dengan memberikan konseling sebelum dan sesudah dilakukan pemasangan IUD sesuai langkah Baku.

### **<b>ABSTRACT</b><br>**

*<i>IUD contraception is one of the methods of long term non hormonal contraceptive that is one of effective methods accepted by the community. Counseling pre installation is very important because it makes more satisfied makes more satisfied clients and assist clients in using contraceptives for longer thus increasing. The success family planning IUD acceptors at the clinic counseling Abadijaya quite high but has not been done before installation. The success family planning IUD acceptors at the clinic counseling Abadijaya quite high but has not been done before installation to its full potential. Descriptive research design using a non random sampling with accidental sampling technique. Performed in the work area Abadijaya clinic in March-May 2012. Sampel are IUD acceptors of family planning methods as many as 49 people. The results showed that knowledge of family planning acceptors of family planning methods IUD is still less than 63,83%. To increase knowledge of the IUD Acceptors then one way to do this is to provide counseling prior to the installation of an IUD.</i>*
