**ABSTRAK
**

Persalinan merupakan peristiwa menegangkan bagi seorang ibu dan dukungan suami ternyata berpengaruh penting terhadap kondisi psikologis ibu bersalin. Penelitian ini bertujuan untuk mengetahui sikap suami terhadap pendampingan persalinan.

Penelitian menggunakan desain deskriptif sederhana. Pengambilan data sampel 103 orang suami dari ibu hamil dengan metode consecutive sampling selama sebulan.

Instrumen penelitian berupa kuesioner pengetahuan sikap yang dikembangkan sendiri oleh peneliti dan Birth Participation Scale yang telah diterjemahkan dalam bahasa Indonesia. Hasil penelitian menunjukkan 89,3% suami memiliki sikap positif terhadap pendampingan persalinan. Pembentukan sikap ini lebih didominasi komponen kognitif dan konatif. Implikasi keperawatan, penelitian ini membuktikan bahwa peran suami penting untuk diperhatikan dalam proses persalinan. Penelitian ini tidak mengidentifikasi faktor yang mempengaruhi pembentukan sikap suami terhadap pendampingan persalinan sehingga penelitian selanjutnya diharapkan untuk meneliti faktor tersebut.
