Abstrak

Penelitian ini membahas tentang bentuk gangguan yang dihasilkan dari ormas yang terjadi beberapa tahun belakangan dengan melakukan tindak vandalisme dan tindak anarkhis, yang dimana peneliti membatasi hanya pada persepsi masyarakat yang dimana menghasilkan fear of gang crime di masyarakat.

Sebagai landasan teori, penulis menggunakan perceived incivilities, penulis juga mengkaji literatur tentang fear of crime dan fear of gang crime. penulis menggunakan pendekatan kuantitatif dengan menggunakan metode survey. Hasil dari analisis data diketahui bahwa terdapat hubungan yang lemah antara perceived incivilities terhadap fear of gang crime dengan nilai positif, sehingga perceived incivilities meningkat, maka fear of gang akan meningkat pula.

.....This study discusses the form of disruption resulting from the society organization that occurred in recent years by committing acts of vandalism and anarchists, which is where the researchers restricted only to the public perception which produces fear of gang crime in the community.

As a theoretical basis, writer used the perceived incivilities, writer also reviews the literature about fear of crime and fear of gang crime. Writer used a quantitative approach with survey methods. It's known from the result of data analysis that there is a weak relationship between perceived incivilities on fear of gang crime with a positive value, so if the perceived incivilities increase, the fear of gang will also rise.
