Abstrak

Penelitian dilaksanakan di Instalasi Kamar Bedah RS Husada tanggal 11- 17 Desember 2012. Penelitian yang dilakukan merupakan penelitian deskriptif kuantitatif-kualitatif, analisa data kuantitatif dengan menggunakan metode Time and motion study, dimana aktifitas perawat bedah diteliti pada kegiatan perioperatif, serta kegiatan diluar operasi. Kemudian dengan menggunakan metode Formula Unit Ruang Bedah dihitung jumlah kebutuhan perawat bedah berdasarkan beban kerja. Penelitian kuantitatif dengan wawancara mendalam mengenai kompetensi yaitu pengetahuan, ketrampilan, dan sikap perawat bedah, kepada 3 responden yaitu Kepala Bagian Bedah, Kepala Perawat, dan perawat bedah di Instalasi Kamar Bedah untuk mengetahui jumlah kebutuhan berdasarkan kompetensi perawat bedah.
