Abstrak

Penelitian ini membahas risiko keselamatan pada aktivitas bermain di area bermain outdoor TK Indria, Beji-Depok Tahun 2013. Penelitian ini adalah penelitian deskriptif observasional yang bertujuan untuk menentukan tingkat risiko keselamatan pada aktivitas bermain terkait penggunaan alat-alat permainan di area bermain outdoor dengan menggunakan metode semi kuantitatif AS/NZS 4360:2004. Penelitian ini melakukan identifikasi bahaya dan risiko di setiap tahapan (task) aktivitas bermain dengan menggunakan metode JHA (Job Hazard Analysis) dan menganalisis nilai probability, exposure, dan consequences di setiap tahapan tersebut berdasarkan tabel semi kuantitatif W.T Fine J. Hasil penelitian menyatakan bahwa tingkat risiko yang dimiliki pada setiap tahapan aktivitas bermain di area bermain outdoor meliputi level very high, priority 1, substantial, priority 3, dan acceptable.

.....

This research discussed the safety risk in playing activity at playgorund area Kindergarten Indria, Beji-Depok 2013. Design for this research was descriptive observational study that objective to determine the level of risk safety on playing activity related playing equipment at playground area using semi quantitative method AS/NZS 4360:2004. The research identified hazard and risk using JHA (Job Hazard Analysis) and analyze the score of probability, exposure, and consequences at each stage in playing activity based on semi quantitative table W.T. Fine J. Results of this research showed that the level of risk at each stage in playing activity at playground area includes very high level, priority 1, substantial, priority 3, and acceptable.
