Abstrak

Penelitian ini mengkaji penyampaian informasi koleksi museum melalui tata pameran yang dapat diterapkan bagi pengunjung berkebutuhan khusus (disabled people). Ada berjuta cara yang dapat dilakukan untuk menginformasikan koleksi arkeologi di museum. Tanpa adanya informasi yang jelas, koleksi tidak akan diketahui maknanya. Pengunjung berkebutuhan khusus menjadi bagian dari penelitian ini. Penelitian dilakukan di Museum Nasional, Jakarta, agar museum ini dapat mengembangkan kembali peran serta di dalam masyarakat, membangun pendidikan nasional Indonesia, serta menyebarkan informasi tentang arkeologi serta kegunaan mempelajari ilmu ini.

.....This research investigated the conveying of information of the museum's collection through the art of display that is applicable to visitors with a special needs which in case are disabled people. There are millions of ways that can be done to communicate archaeology artifact's information, without clear information then there is no sense. Visitors with special needs becomes part of this research. Research is done on the Museum Nasional, Jakarta, so that museum can redevelop the participation of the people and to raise national education of Indonesia as well as distributing information about archaeology and the use of studying this subject.
