Abstrak

Perawatan pada lansia di panti tresna werdha X dilakukan berdasarkan rutinitas kerja dan petugas belum mendapat pelatihan mengenai kebutuhan dasar lansia yang harus dipenuhi. Berdasarkan hal tersebut, peneliti ingin mengetahui hubungan budaya kerja petugas panti menurut persepsi lansia dengan kejadian pengabaian di PSTW X Sumatera Barat. Desain penelitian deskriptif korelasi, menggunakan pendekatan cross sectional. Pengambilan sampel dengan total sampling, berjumlah 75. Uji statistik digunakan chi square dan regresi logistik. Hasil yang diperoleh seluruh lansia mengalami pengabaian; ada hubungan antara sikap terhadap apa yang dikerjakan, lingkungan pekerjaan; waktu dengan pengabaian lansia; Tidak ada hubungan antara perilaku ketika mengambil keputusan dengan pengabaian lansia. Sikap terhadap apa yang dikerjakan memiliki pengaruh paling besar terhadap kejadian pengabaian lansia.

Disimpulkan bahwa petugas harus lebih memahami tentang peran dan fungsinya sebagai pemberi pelayanan pada lansia. Direkomendasikan agar pejabat yang berwenang dapat menempatkan petugas panti sesuai dengan peran dan fungsi serta kewenangannya, dan merekrut perawat sesuai dengan kebutuhan panti.;The nursing of elderly in Tresna Werda X nursing home is mainly based on the workrout in and that the caregiver have not yet received training on the basic needs of the elderly that they should meet. Therefore, the researcher wanted to know the relations of the work culture of caregiver according to the elderly's perception with the incidence of neglect in PSTW X West Sumatera. This study used Descriptive correlation design with cross sectional approach. The method of sampling used total sampling, which amounts to 75. The statistical test used chi square and logistic regression. The results of the study show that all of the elderly experienced neglect; there is a relation between attitude towards what is conducted, work environment, time with elderly neglect; no relation between behavior in making decisions with elderly neglect. The attitude towards what is conducted has the most impacton the incidence of elderly neglect. It is concluded that the caregiver should have a better understanding on their roles and functions as the caregivers to the elderly. Moreover, it is recommended that the authorities should put nursing personnel in accordance with the roles, functions and competence, and recruit nurses in accordance with the needs of the nursing home.
