Abstrak

Pelayanan rehabilitasi sosial bagi penyandang disabilitas yang diselenggarakan oleh panti mempunyai kelebihan dan kekurangan. Salah satu kekurangan adalah kecil daya tampung panti dengan jumlah penyandang disabilitas yang ada. Hasil penelitian ini mengungkapkan bahwa input pelayanan rehabilitasi sosial berupa klien, sumber daya manusia, sarana prasarana, budaya, teori/metode dan umpan balik relatif sudah terpenuhi. Konversi operasi didukung komponen struktural dan proses fungsional terlaksana namun belum optimal. Output pelayanan rehabilitasi sosial, beberapa klien sudah mandiri baik bekerja secara mandiri maupun bekerja di perusahaan. Faktor pendukung berupa kelembagaan, personil, sarana dan prasarana, pembiayaan. Sedangkan faktor penghambat berasal dari klien dan sistem sosial.

<hr>Social rehabilitation services for disability-based organized home has advantages and disadvantages. One drawback is the small capacity of the home with the existing number of persons with disabilities. Results of this study revealed that the social rehabilitation input in the form of client services, human resources, infrastructure, culture, theory / methods and relative feedback has been fulfilled. Conversion operations are supported structural components and functional processes implemented but not optimal. Output social rehabilitation services, some clients have good self to work independently as well as working in the company. Factors such as institutional support, personnel, facilities and infrastructure, financing. While the limiting factor from the client and the social system.
