Abstrak

Praktek Kerja Profesi Apoteker dilaksanakan di PT. Fabindo Sejahtera Kampung Waru RT09/04 Desa Pasir Jaya, Kecamatan Cikupa, Tangerang Peride 1 April-Mei 2013. Praktek Kerja Profesi Apoteker di industri kosmetik bertujuan untuk mengetahui penerapan ketentuan CPKB di industri kosmetik, khususnya pada PT Fabindo Sejahtera, mengetahui tugas dan tanggung jawab apoteker di industri kosmetik, selain itu menjadi program yang mampu memberikan bekal pengalaman kerja di bidang industri kosmetik bagi mahasiswa calon apoteker. Penulisan laporan dilakukan dengan metode observasi langsung dan studi literatur. Tugas khusus yang diberikan berjudul Pengaruh Penambahan Lanolin Anhidrat Dan C10-C30

Kolesterol/Lanosterol Ester Terhadap Kondisi Sweating Dan Karakteristik Aplikasi Lipstik di Bibir. Tugas khusus ini bertujuan mengetahui pengaruh penambahan Lanolin Anhidrat dan C10-C30

Kolesterol/Lanosterol Ester terhadap kondisi sweating dan karakteristik aplikasi lipstik di bibir. Lipstik diformulasi dan diproduksi pada skala laboratorim dan di uji kondisi sweatingnya dengan menggunakan metode Sweating Test dan di uji aplikasinya di bibir dengan metode Panel Test. Didapat hasil formula dengan C10-C30 Kolesterol/Lanosterol Ester lebih sedikit mengalami sweating dibandingkan formula dengan Lanolin Anhidrat sebagai pencegah sweating. Dan formula yang menggunakan C10-C30 Kolesterol/Lanosterol Ester lebih disukai berdasarkan kenyamanan aplikasi dan penyebaran warna pada bibir.

.....
Pharmacist Internship Program was implemented PT. Fabindo Sejahtera, Kampung Waru RT 09/04 Desa Pasir Jaya, Kecamatan Cikupa, Tangerang Period April 1st - May 14th 2013. It aims to know GMP compliance in cosmetic industry, especially in PT Fabindo Sejahtera and to understand the duties and function of pharmacist in cosmetic industry and to provide work experience in the field of cosmetic industry for prospective pharmacists. Report writing is done by direct observation and study of literature methods. Specific task titled the effect of Lanolin Anhydrous C10-C30 Cholesterol/Lanosterol Esters Addition in Sweating Condition And Characteristics of Lipstick on Lip Applications. This study aims to find out effect in sweating condition and characteristics of lipstick on lip applications with additon of Lanolin Anhydrous C10-C30 Cholesterol/ Lanosterol Esters. The lipstick to be tested was formulating and producing in laboratory scale and then sweating in lipsticks tested by Sweating Test method and its application by Panel Test method. Results obtained with the formula C10-C30 cholesterol / lanosterol esters are less sweating than formula with Lanolin Anhidrat as a sweating deterrent. And formula using the C10-C30 cholesterol/lanosterol esters are preferred based on application and color dispersion on the lips.
