Abstrak

Kota kota besar di Australia sedang menghadapi masalah ledakan penduduk yang tidak dapat terbendung. Hal ini dikarenakan oleh angka kelahiran dan jumlah pendatang yg tidak terkontrol. Ledakan penduduk tersebut menyebabkan hilangnya ruang hijau di kota besar untuk menyesuaikan kebutuhan akan ruang hidup. Masalah yang terjadi menjadi isu regional. Daerah Woodford yang terletak di tengah Queensland berpotensi untuk menguji ide dan nilai untuk menghubungkan kembali alam dan manusia. Observasi dan riset membuahkan hasil kepada terciptanya solusi untuk ide master plan dan arsitektur di tahun 2050. Gaya hidup produktif adalah hasil dari proses perancangan master plan dan arsitektur yang terukur melalui interaksi mutualisme antara pendatang dan orang lokal dalam beraktivitas di Woodford.

<hr><i>Big cities in Australia are facing an undeniable urban sprawl that is caused by the uncontrollable birth and high number of incoming immigrants. The urban sprawl results on the absence of greenspace in big cities, adjusting spaces to people to live inside the cities. Moreover, architects are important to vision the condition of the city and analyze how the city will be livable or not. Communicating future scenario will be essential as the trigger to create potential solution for living in big cities. Architecture rise radically in the future, creating a severe condition of neighborhood. Big cities of Australia offer modern lifestyle yet destroying its heritage, nature and identity.

As the issue becomes regionally concerned, the Woodford site in central Queensland becomes the potential experiment whether the values to reconnect the nature and identity will be successful or not. Observation and research for masterplanning covers up solution that is needed for the region and applicable for 2050. Keeping the site to preserve its natural context becomes an important point for promoting 2050 Woodford site. Further observation leads to ideas of how to create feasible masterplan and vibrant society. Woodford Festival which happens annually becomes the promotional event to adjust the values in the site to the visitors. Expected change of habits of visitors that come to the site will be the answer to achieve contrasts outcome.

Productive lifestyle that occurs from the design is the result of thoughtful masterplanning that shifts into architecture. Interactions between locals and visitors which are mutually shaped in the site will bring back the idea of reconnecting with the nature. The design derives from the spirit of sustain food production as well as creating boundaries for privacy level. Thus, concept can be experimented and tested from this exclusive design for the people at Woodford.</i>
