Abstrak

Skripsi ini membahas evaluasi penerapan keselamatan kebakaran gedung dengan menggunakan perangkat lunak Computerized Fire Safety Evaluation System (CFSES) di Kementerian Pariwisata dan Ekonomi Kreatif yang terletak di Jakarta Pusat. Evaluasi dilakukan berdasarkan kesesuaian 12 safety parametes dan persyaratan tambahan pada NFPA 101A: Alternate Approaches to Life Safety dengan standar NFPA 101: Life Safety Code.

Hasil penelitian menunjukkan bahwa penerapan keselamatan kebakaran di Gedung Kementerian Pariwisata dan Ekonomi Kreatif belum memenuhi persyaratan keselamatan minimum pada NFPA 101: Life Safety Code.

.....This study discusses the evaluation of fire safety of buildings using software Computerized Fire Safety Evaluation System (CFSES) at the Ministry of Tourism and Creative Economy, which is located in Central Jakarta. The evaluation is based on suitability 12 safety parametes and additional requirements in NFPA 101A: Alternate Approaches to Life Safety to NFPA 101: Life Safety Code.

The results showed that the application of fire safety at the Ministry of Tourism and Creative Economy not meet the minimum safety requirements in NFPA 101: Life Safety Code.
