

Probability and statistics for engineering and the sciences

Devore, Jay L., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20372059&lokasi=lokal>

Abstrak

Contents : Overview and descriptive statistics -- Probability -- Discrete random variables and probability distributions -- Continuous random variables and probability distributions -- Joint probability distributions and random samples -- Point estimation -- Statistical intervals based on a single sample -- Test of hypotheses based on single sample -- Inferences based on two samples -- The analysis of variance -- Multifactor analysis of variance -- Simple linear regression and correlation -- Nonlinear and multiple regression -- Goodness-of-fit tests and categorical data analysis
