

Handbook of the psychology of aging

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20379661&lokasi=lokal>

Abstrak

The Handbook of the Psychology of Aging has become the definitive reference source for information on the psychology of adult development and aging. It provides comprehensive reviews of research on biological and social influences on behavior and age-related changes in psychological function. The seventh edition of the Handbook will contain all new material and include an entirely new section devoted to what neuroscience has discovered on cognitive aging. Contains all the main areas of psychological gerontological research in one volume Entire section on neuroscience and aging Begins with a section on theory and methods Edited by one of the father of gerontology (Schaie) and contributors represent top scholars in gerontology
