.....This study aims to analyze the effect of corporate governance, ownership structure, and capital structure on agency cost of non-financial companies listed on the Indonesia Stock Exchange in 2008-2012. Corporate governance is proxied by board of commissioner size and proportion of independent commissioners. Ownership structure is proxied by managerial ownership and institutional ownership. Whereas, capital structure is proxied by debt-to-asset ratio. In this study, agency cost is measured by asset utilisation ratio. This research is a quantitative research by using panel data regression. This research is analyzed with Random Effect Model (REM).

The result shows that corporate governance, ownership structure, and capital structure simultaneously have significant effect on agency cost. Furthermore, board of commissioner size, managerial ownership, institutional ownership, and debt-to-asset ratio significantly affect agency cost and have negative correlation with agency cost.
