Abstrak

Menurut ajaran Islam laki laki beriman diharuskan untuk menjaga pandangan dan kemaluannya. Namun ternyata terdapat pemuka agama yang melakukan pelecehan seksual karena tak mampu mengontrol gairah seksualnya. Penelitian ini bertujuan untuk melihat hubungan antara kompulsivitas seksual dan religiositas Islam pada mahasiswa laki laki muslim. Sebanyak 241 mahasiswa laki laki muslim yang tergabung dalam kelompok berafiliasi agama Islam mengisi Sexual Compulsivity Scale dan Muslim Religiosity Personality Inventory Scale yang mengukur kompulsivitas seksual dan pandangan dunia Islaminya. Kompulsivitas seksual merepresentasikan hadirnya preokupasi berlebihan terhadap seks dan pandangan dunia Islami merepresentasikan berbagai macam hal yang seharusnya diketahui dipercayai dan dipahami oleh seorang muslim terhadap Tuhan dan Islam. Hasil penelitian menunjukkan terdapat korelasi negatif yang signifikan antara kompulsivitas seksual dan religiositas Islam $r = 0.128$ $n = 241$ $p = 0.05$ two tail walaupun derajat hubungan masih tergolong lemah. Oleh sebab itu semakin tinggi tingkat kompulsivitas seksualnya maka semakin rendah pemahaman dan keyakinan seseorang terhadap Tuhan dan agamanya.

.....

There is an Islamic faith that tell the believing men to reduce of their vision and guard their private parts. But surprisingly there was Islamic religious leaders who committed sexual harassment and confess that they were unable to control their sexual arousal. The current study examined associations between sexual compulsivity and Islamic religiosity among muslim college men. Two hundred and forty one muslim college men who joined Islamic affiliated group completed Sexual Compulsivity Scale and Muslim Religiosity Personality Inventory Scale that assess their sexual compulsivity and their Islamic worldview. Sexual compulsivity represent excessive preoccupation with sex acts and encounters while Islamic worldview represent what a Muslim should know believe and inwardly comprehend about Allah and Islam. Negative correlation were found between the measure of sexual compulsivity and Islamic religiosity although the degree of relationship was weak $r = 0.128$ $n = 241$ $p = 0.05$ two tail. It indicates that the higher their sexual compulsivity level the lower their Muslim's belief and understanding about Islam and Allah.
