Abstrak

Penelitian ini menjelaskan mengenai tahapan proses rehabilitasi sosial AN/ABH. Rehabilitasi sosial AN/ABH dilaksanakan untuk merubah perilaku klien AN/ABH agar dapat kembali berfungsi sosial. Metode yang digunakan adalah metode penelitian kualitatif dengan studi deksriptif di PSMP Handayani. Hasil penelitian menunjukkan bahwa proses rehabilitasi sosial AN/ABH di Panti sosial rehabilitasi, dilaksanakan dalam delapan tahapan proses rehabilitasi, yaitu tahap pendekatan awal, penerimaan, assesmen, perencanaan intervensi, pelaksanaan intervensi, resosialisasi, bimbingan lanjut, dan terminasi. Dalam pelaksanaannya terdapat faktor-faktor penghambat dan pendukung dalam proses rehabilitasi sosial AB/ABH yang dilakukan oleh PSMP Handayani.

.....

This study describes the stages of the implementation process of social rehabilitation of juvenile delinquents and children in conflict with the law. Social rehabilitation carried out to change the behavior of the client. The method used was qualitative research methods with descriptive studies in PSMP Handyani. The results showed that social rehabilitation at the center of social rehabilitation, divided into eight phases of the rehabilitation process, the initial approach phase, admission, assessment, planning, intervention, implementation of interventions, resocialization, further guidance, and termination. In its implementation there are factors inhibiting and supporting the social rehabilitation process conducted.
