## Abstrak

Peralatan medis merupakan syarat utama yang harus dipenuhi rumah sakit untuk operasional. Namun seringkali pengadaan peralatan medis menjadi berlebihan atau bahkan sebaliknya peralatan medis tidak sesuai dengan fungsi pelayanan. Di Indonesia yang merupakan salah satu negara berkembang memiliki banyak kendala bagi pemilik atau investor dalam membeli peralatan medis. Kurangnya informasi mengenai spesifikasi, kelebihan, kekurangan dan harga peralatan medis. Tidak adanya standar harga yang jelas, dan sangat bergantung kepada distributor. Penelitian ini bertujuan menyusun kebutuhan peralatan medis RS Dr Hafiz di Cianjur tahun 2014 dengan mengambil model perencanaan peralatan kesehatan berdasarkan analisis komparasi antara RS Anna Medika dengan pedoman peralatan kesehatan rumah sakit kelas C yang dikeluarkan oleh Kemenkes. Hasil komparasi jumlah peralatan medis RS Anna Medika sudah memenuhi standar minimal pelayanan rumah sakit kelas C meski belum sesuai dengan Pedoman Peralatan Kesehatan Rumah Sakit Kelas C, sehingga Rumah Sakit Dr Hafiz dapat mengacu pada perencanaan pengadaan peralatan medis RS Anna Medika.

Medical equipment is a major requirement that must be met for hospital operations. But often the procurement of medical equipment to be excessive or even medical equipment is inappropriate with the service function. In Indonesia, which is one of the developing countries have a lot of obstacles for owners or investors in the purchase of medical equipment. Lack of information about the specifications, advantages, disadvantages and prices of medical equipment. The absence of a clear standard price, and very dependent on the distributor. This study aims to develop a need for medical equipment Hospital Dr Hafiz in Cianjur 2014 by taking medical equipment planning models based on comparative analysis between Anna Medika Hospital with medical equipment guidelines hospital grade C issued by the Ministry of Health. The results of the comparative amount of medical equipment Anna Medika Hospital has met the minimum standard C-class hospital services, although not in accordance with the Guidelines for Hospital Medical Equipment Class C, so that the Dr hafiz Hospital can refer to medical equipment procurement planning Anna Medika Hospital.
