

Hepatotoxicity : from genomics to in vitro and in vivo models / editor, Saura Sahu

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20395854&lokasi=lokal>

Abstrak

This book addresses all the current, up-to-date developments in this scientific discipline. Liver is the chief metabolizing site in the body, and thus, it is a major target organ for drug and chemical toxicity. Therefore, hepatotoxicity is an important endpoint in the safety evaluation of drugs and chemicals.

Contributions from leading investigators in hepatotoxicity research address current developments in this scientific discipline and discuss use of current cutting edge technology such as microarrays in hepatotoxicity thus providing a better understanding of hepatotoxins, their interactions and mechanisms of action.
