Deskripsi Lengkap: https://lib.ui.ac.id/detail?id=20397006&lokasi=lokal

\_\_\_\_\_

Abstrak

This book presents a market-consistent valuation framework for implicit embedded options in life insurance contracts. This framework is used to perform an empirical analysis based on more than 110,000 actual and in-force life insurance policies and with a focus on the modeling of interest rates. Its results are the answer to the central question posed in the objectives :

What value do the embedded options and guarantees considered have?

<br><br>>

This question is answered both absolutely and relative to the current policy reserves, from the perspective of the insurer, the policyholder and the shareholder respectively.
