

Applications of titanium dioxide photocatalysis to construction materials : state-of-the-art report of the RILEM technical committee 194-TDP

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20397329&lokasi=lokal>

Abstrak

Due to the semiconducting nature of its anatase crystal type, titanium dioxide in construction materials acts as a photocatalyst and exhibits air purifying, self-cleaning and antibacterial action. This book covers the theory and applications of the process
